

Updating Your Siding with D&D Inc.

Replacing your siding is one of the easiest ways to dramatically improve the look and value of your home. Did you know that most siding replacements are completed in just a few days?

Top Siding Manufacturer Guides
- styles and colors -

Hardi Plank Siding (preferred)

LP SmartSide (preferred)

Vinyl Siding - Certain Teed
OR
Mastic

A few things to consider when thinking of replacing your siding:

- **Age:** Outdated siding can significantly affect the value of your home, and your ability to sell in the future. Also, the older the siding, the more likely it is to blow off in a storm.
- **Style:** Siding styles have taken a big turn in the last few years, leaving many homes with an outdated look.
- **Condition:** Look for faded, loose, warped, dented, or missing panels, and in the case of wood siding, rot, mold, mildew, cracking, splitting, etc. Siding can leak just like a roof.
- **Your Contractor:** In order for you to realize all of the benefits and the full life span of your new siding, it must be installed properly by experienced technicians. All of D&D Inc. expert technicians are experienced in the installation and repair of all types of siding.

"Do I need county approval for siding work to be completed?"

No inspections are needed by the county but if you live in an HOA be sure to get your siding color approved if you are doing a replacement.

Siding Products and Information

House Wrap

We start by wrapping your house in house wrap, this adds an extra layer of protectant against the element.

Upgrade -ESP Insulated House Wrap

Trim

Whenever we replace siding, we replace trim at the same time. Trim can include cornice, under porch, overhang, soffit, gables, etc.

Facia board: We clad it in aluminum coil (or Hardi / LP Smart Side Trim). The gutters are then nailed to this.

Casing around window and doors is all replaced.

Specialty: bay window, wrap columns (cedar)
Accent underporch soffits with shiplap or headboard

Shutters

It is also a good idea to replace your shutters at the same time as your siding so you have an updated and cohesive look

Gutters

At D&D Inc, we usually recommend that you replace your gutters at the same time as your siding. We primarily use seamless 6 inch K or OG style aluminum gutters.

Gutter Guard Protection System

This is the perfect time to add a gutter guard protection system to your gutters. There are many different systems that we can add depending on your specific needs.

Extras and Upgrades

- Specialty bay windows
- Wrap Porch Columns (cedar is a popular choice)
- Accent under porch soffits with shiplap or bead board
- Accent siding options: Shake or Board and Batten Siding

Siding Tips

As you look into having siding work completed, we suggest the following tips to aid you. If you should have any questions please feel free to get in touch.

- 1.) The best way to choose a siding color is to start by looking in the guides listed above. There are many different color options to choose from, we are happy to give suggestions as well.
- 2.) Most siding jobs require that we have access to electricity. If an outside electrical outlet is not available, we ask that you leave an outside porch light or similar light on so that we can tap into that electricity source.
- 3.) In most cases, the siding is delivered via a large truck. We ask that your driveway is clear on delivery day to ensure that the truck can successfully drop off the materials.
- 4.) Due to hammering on exterior walls of the home it is recommended that all loose pictures, wall hangings, mirrors or any other items on exterior walls be removed. Nail pops may develop on drywall due to hammering on exterior walls. D&D cannot be held responsible for interior walls that may get damaged.
- 5.) Please be aware that if you have a bathroom niche located on an exterior wall, we are not liable for any interior damage caused by siding nails protruding into that space. We thank you for understanding.
- 6.) D&D will reinstall existing light fixtures or similar style fixtures. If you are interested in new style lighting fixtures we suggest a certified electrician be contacted.
- 7.) Although our crews keep the work site as clean as possible, there is always a chance that some roofing nails and materials make their way to the ground and/or driveway. We ask that you please keep this in mind and take caution of yourself, your family members and vehicles.
- 8.) Although we are careful not to damage your lawn or landscaping; if there is a particular area that you are concerned about protecting please inform us so that we may take extra precautions to protect that area from debris.

*Thank you,
D&D Inc.*
